PUBLIC HEARING ON BATHING BEACH

Dr. Albert York presided at a public hearing held at Mattapoisett Town Hall to inform the townspeople of the results of tests taken to determine the source of bacterial pollution running into the bathing beach. George Heath of the Board of Health explained clearly, using blackboard diagrams, the extensive test samplings of the chain which empties into the bathing beach. He said that no bacterial test could be taken because of the cold water. The tests made were to determine the presence of household wastes in the drain. This was done by determining the presense of detergent in the drain. The results of 40 or so tests showed that household waste is present in all but 3 locations which are all above Church Street. Mr. Heath said that run-off water is the cause of the trouble and can't be helped because the whole area is very wet ground.

When opposition was expressed, by the majority of the group present, to the moving of the mouth of the drain out of the bathing beach to the opposite side of the wharf, Mr. Heath said that this solution was proposed because it would eliminate the problem at the least cost to the town.

Many questions were asked and suggestions made covering a wide range. At one point, Mr. Heath was asked, "are these good or bad bacteria?" Apparently scientific tests haven't proceeded into bacteriological politics. Mr. Heath did not attempt to break down friend from foe among Mattapoisett bacteria. The suggestions were to cover the brook, fence the salt water area polluted, post signs, close the beach when the life guard goes off duty, pipe the drain to the end of the wharf

and build a sewerage system. When the latter was proposed Mr. Winslow, the town treasurer, rose to extimate a sum of 1½ million dollars for a start, for part of the town. He suggested that the town had its hands full with the new high school at the present time.

A vote was called for to be a guide to the Selectmen in their action on Article 58. It was stated from the floor that "this is not a representative body". However, the voice vote was taken from the group to fence off the polluted area as a temporary measure this Summer and to see if the town would appropriate the money at the next town meeting to pipe the drain to the end of the wharf.

At the annual Town Meeting in March the voters took this action on Article 58. It was voted to appropriate a sum of $6,775.00 to change the direction of the drain in the parking lot at the Public Bathing Beach so that the mouth of the drain will enter the harbor at the west side of the Barstow wharf.

The resolution added at that time called upon the Board of Health, the Board of Selectmen and other interested parties to make tests of the drain in an effort to determine the solution to the problem. If none could be found then the wish of the voters was to be carried out. It was also voted that the results of the Board's finding would be given at a public hearing called in conjunction with the Board of Selectmen.

HIGHWAY SAFETY

Assistant Director of Safety, T. R. O'Brien, told the ALA Safety Committee that "last year the nation spent over $40,000 in research per polio death and $500,000 in research per aviation death. Yet it appears that the entire nation could afford only three dollars to spend on research into the cause of each highway fatality last year."

Dear friends,

The details involved in directing the average funeral are almost countless.

However, those who attend a well directed funeral have no realization that the program is the result of careful planning. A smooth, dignified service is never accidental. We consider this phase of our work as perhaps the most important part of our profession.

Respectfully,

Carl C Cornwell
